

Dear colleagues,

After Brazil in 2006, China in 2007, Mauritius in 2008 and Argentina in 2009, JFIM (Journées Francophones d'Imagerie Médicale) for their 8th edition will be held in Singapore. Hub of Asia, the peninsula is at the heart of the Asian and Oceanic, allowing exchanges and meetings with our colleagues from across the region. We do not waver again this year, the principles founders of these days aimed at promoting French universities and the Francophonie through medical cooperation and scientific exchanges with our colleagues around the world. The JFIM are pleased and honored to co-host this event with our fellow Singaporeans through the College of Radiology, Academy of Medicine, Singapore and the Singapore Radiological Society and under the auspices of the ECP (European Cancer Prevention Organization) and the French Society of Radiology. An ambitious scientific program has been developed by the share for new technologies and advances in imaging and oncology. Finally, approved by the FEPUR the JFIM lead to the validation of CME points for 4 years. We wish you an excellent conference.

Secrétaire des JFIM / JFIM secretary

Luc Rotenberg
